Time for the family to enjoy home comforts

Now you're settling in, find out how the T Series range can really help you make the most of your new home. Now, and in the future.

Watch our video

Clear the air and get things back to normal

If you're remodeling your new home, it can take a while for the dust to settle. Our range of air purifiers, dehumidifiers and ventilation systems will bring a breath of fresh air to your living space, putting you in control of your indoor environment and helping to protect your investment against problems like this:

Paint, carpet and furniture odors

A new home means new smells – some welcome, some not. Our purifiers remove odors and improve the air quality throughout your home, so your family can breathe easier.

Dust and particulates

Even the smallest remodelling projects can leave microscopic irritants in the air. Our filters remove dust and particulates, as well as potentially harmful allergens and bacteria.

Damp basement odors

Basements are prone to humidity and the tell-tale odors that go with it. Our dehumidifiers will keep yours fresh and dry all year round – and help avoid any potentially costly renovations later.

Humidity levels

Too much humidity can warp or curl your precious interiors, too little and you'll see cracks and shrinkage. Keep the balance right with our humidifiers and dehumidifiers and protect your woodwork, flooring, artwork and electronic equipment.

We'll help you look after your new home

Energy cost savings

We know that moving can be expensive. That's why each of our T Series thermostats are engineered to ensure your heating system runs efficiently, saving money on your energy bills.
